Comment [A1]:

In order to have the table of contents displayed properly:

- Use Ctrl-A to select the whole document
- Use F9 to update all variable fields
- When the question 'Do you want to update the table of contents?' appears, choose the 'Create a new table of contents.' option.

1. DOCUMENT

1.1 OBJECTIVE

This project handbook describes the project, the organization and the proceeding in the project NexOwn V2.3 Multiple Searchabos as cooperation between the contractual partners ERNI Consulting AG and NexOwn Holding AG.

This project offers the following new features to all registered users:

- the possibility to save up to 10 different Searchabos.
- the possibility to save favorites as in the app.
- a detail page (again) with more info about the internal offers (short description).
- adaption of the MyMarket page for a better user experience.
- mapping possibilities and ranking for internal offers.

Table 1 Referenced Documents

Comment [A2]:

In every chapter of the project handbook, the respective information has to be filled in. If this is not done, a short explanation has to be provided in the particular chapter. No chapters are to be deleted. Additional chapters can be added. In the individual chapters, references to further documents can be given.

ERNI

2. PROJECT

2.1 PROJECT GOAL

- Offer registered buyers possibility to save up to 5 searchabos
- Offer a better user experience for the MyMarket Page
- Offer the admin a better public relation with internal offers

Comment [A3]:

Definition of the most important project objectives, the sought-after final state. (See "ERNI Essential No. 2, Project Management" – Defining the Objectives)

2.2 UNIQUE SELLING PROPOSITION

- Handle up to 5 Searchabo on the biggest succession platform
- Have favorites over internal and external offers
- Have an easy access to the succession market
- Premium Account which offers a lot of additional "comfort" feature
- Free Account: A overview of the swiss market for free

2.3 TARGET GROUPS

- Persons who want to buy a company
- Persons who want to get an overview of the swiss succession market
- Persons who want to trigger if their dream company is for sale
- Persons who want to expand their business
- Persons who want to get succession consulting

2.4 PROJECT SCOPE

- Refactor the MyMarket Place
- Refactor the behaviour of the actual Searchabo creation
- Improve the public offer details for internal offers

Comment [A4]:

Description of the volume and the outline of the project:

- What topics does the project cover?
- What topics are not covered by the project? What objectives, which might wrongly seem to belong to the project, should explicitly not be achieved by the project?
- Interfaces (organizational and technical)

2.4.1 TOPICS NOT COVERED BY THE PROJECT

- NexOwn Platform with higher or lower Version Numbers

3. PROJECT MANAGEMENT

3.1 ROLES & RESPONSIBILITIES

Role	Name
Product Owner	Team NexOwn (Reto Meli, Andreas Matti, Daniel Erni, Selim Akyol)
Requirements Engineer	Selim Akyol
Project Manager	Selim Akyol, Faith Coremo
Scrum Master	Marcelo Barretto
Development	Team Manila
Account Manager ERNI	

3.2 DEVELOPMENT ROADMAP

Phase	Features	Release Dates
Phase 1	-Prototype -Requirements	20.04.16
Phase 2	-Estimation -Design Template -Contract -Project Setup	29.04.16
Phase 3	-Implementation	30.05.16
Phase 4	-Change Request implemented -Bugfixing	10.06.16
Phase 5	Go Live	13.06.16

4. SITEMAP

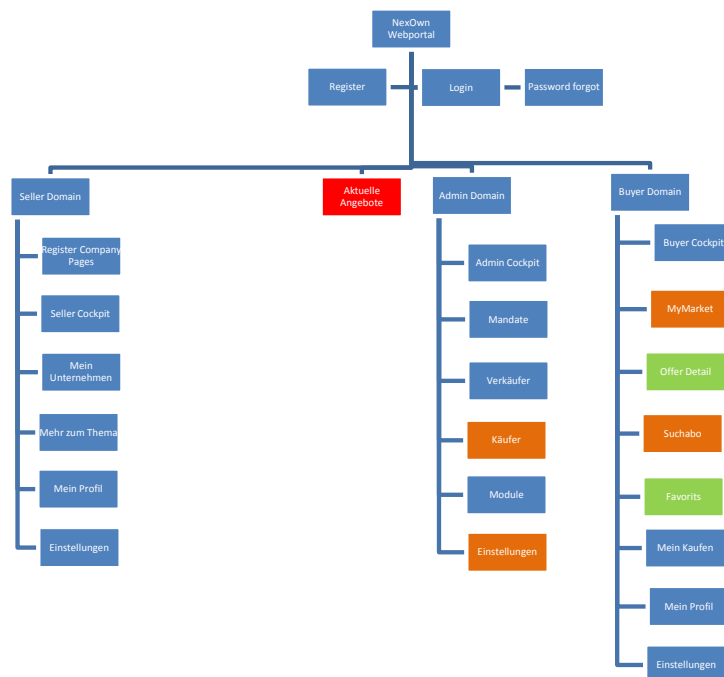

Abbildung 1: Sitemap with changed and new pages

Legends:

- BLUE: No Changes on this page
- Orange: Changes on this page
- Green: New Page
- Red: Removed / no longer needed

5. BUYER REQUIREMENTS

5.1 LANDING PAGE AFTER REGISTRATION

After the registration the buyer lands on the page where he can choose if he wants to have a free account or a premium account.

This page display a table which feature is available for which account.

Free Account:

If the user choose the free account he will be forwarded to the MyMarket Page with the light functionalities.

Premium Account:

If the user choose a premium account he can choose between:

- 3 Months for 14.70 CHF/Month
- 6 Months for 9.90 CHF/Month
- 12 Months for 7.70 CHF/Month

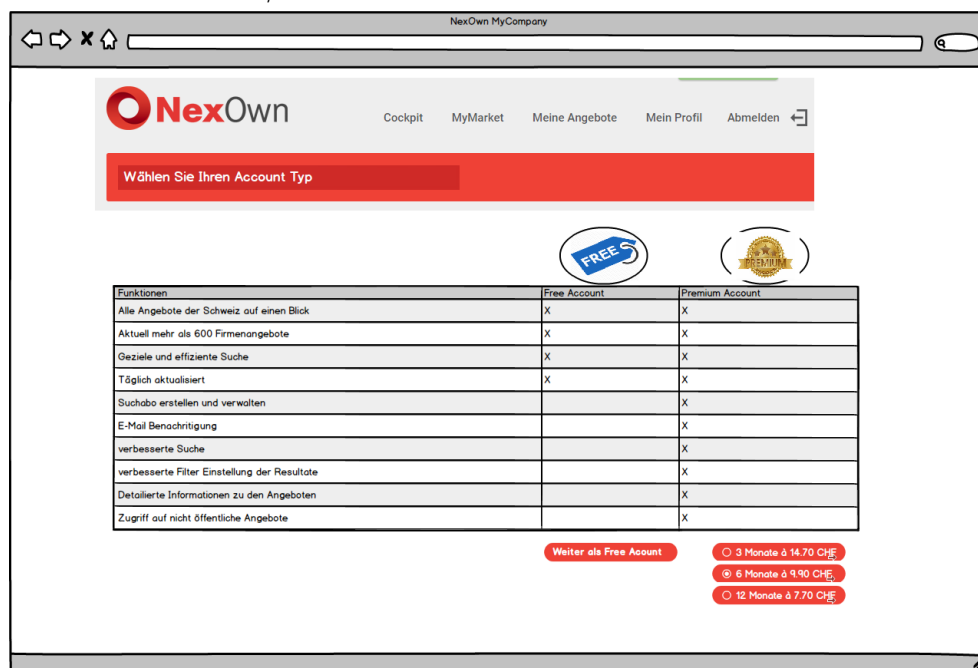

Abbildung 2: Landing Page after Registration

5.2 PAYING MODULE

For the payment we would like to use the swiss postfinance module, which is also an customer of ERNI. So if the buyer has selected a premium account with the duration, he will be forwarded to the payment module, where he can do the payment with a selected payment method.

Following Payment Methods should be supported by Postfinance:

- Postfinance
- Postcard
- eFinance
- VISA
- MasterCard
- American Express
- PayPal

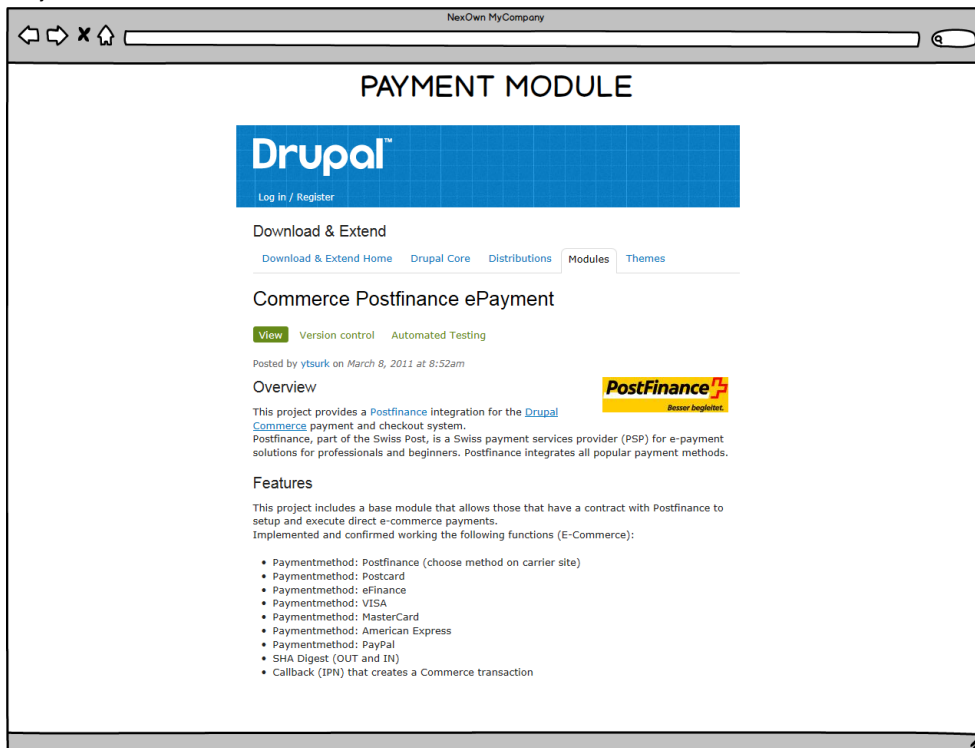

Abbildung 3: Postfinance Drupal Payment Moudle

5.3 LANDING PAGE AFTER SUCCESSFUL PAYMENT

If the user has successfully made the payment he lands on a page, where he sees the nexown confirmation.

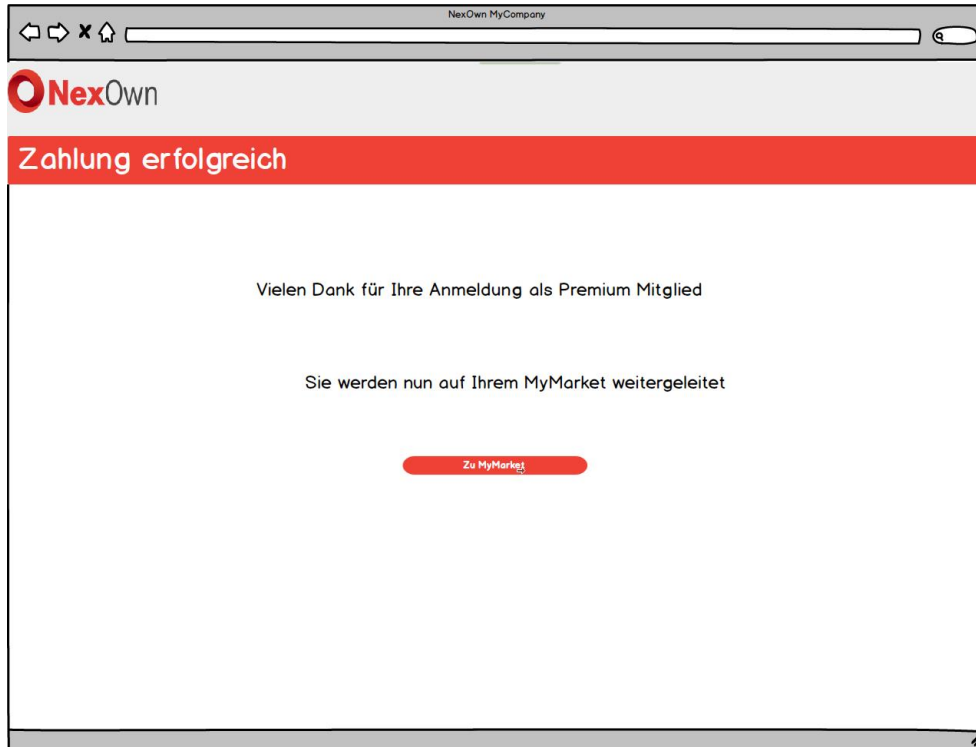

Abbildung 4: Landing Page after sucessfull payment

5.4 EMAIL NOTIFICATION IN REGISTER AND MYPROFILE

Due that for every searchabo the buyer can select if he wants to receive notifications, we don't need any more to ask about that in the register page or in the "Mein Profile" page. So we can remove this question with the radio boxes.

ERNI

5.5 UPDATE MYMARKET

After a lot of positive and constructive feedback, it's time to refresh the MyMarket page with new features.

Also we make a difference between free account and premium account. Summarized following feature are only available for premium:

Feature	Free	Premium
Free Text Search		X
Saving Searchabo		X
Ordering Offers		X
Published Date		X
Internal and external Offer Rating		X
Allready clicked Offer		X

Buried the Features in Free Account:

To make all the premium features “tasty” for the free user, the features are visible but buried. If he clicks on it, he see a message where we explain that this feature is only available for premium members including a link to the account overview page, where he has the upgrade options.

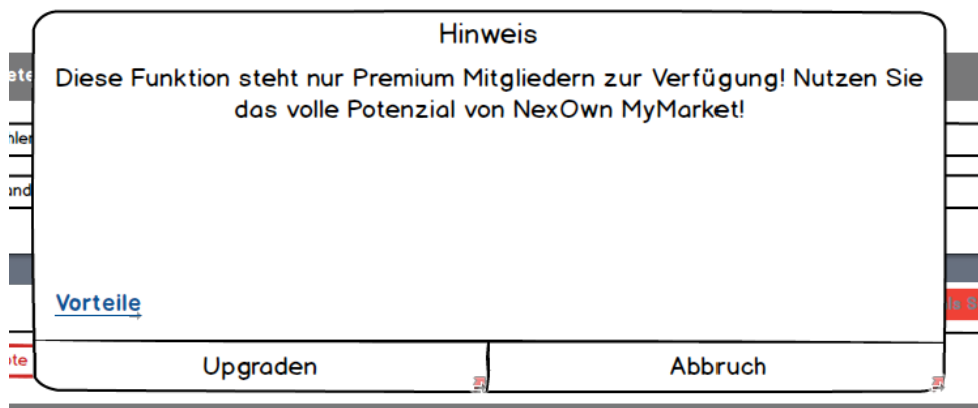

Abbildung 5: Upgrade Message

5.5.1 RATING OF INTERNAL OFFERS

To increase the reachability of buyers, we want to offer a rating system for the internal offers. This rating has an impact on the behaviour of the filters.

Mostly on the region:

- All offers that are in the adjacent region will be shown with a rating of 2. (All other criteria have still to match.)
- If the admin has selected an area instead of a region, then the rating will be set to the value set in the mapping keyword.

5.5.2 SEARCHABO DROPBOX:

On top of the page, the user can now switch between all saved searchabo. The drobox displays the name of the searchabo that the user has created.

Switching between the different searchabos, will load the page with all saved criteria and display the matching offers.

5.5.3 MENU STRIP FOR THE MYMARKET PAGE

Next to the Searchabo drop box we have two buttons for:

- Favoriten: Links to the Offers Favourite Page
- Verwalten: Links to the Searchabo Overview Page

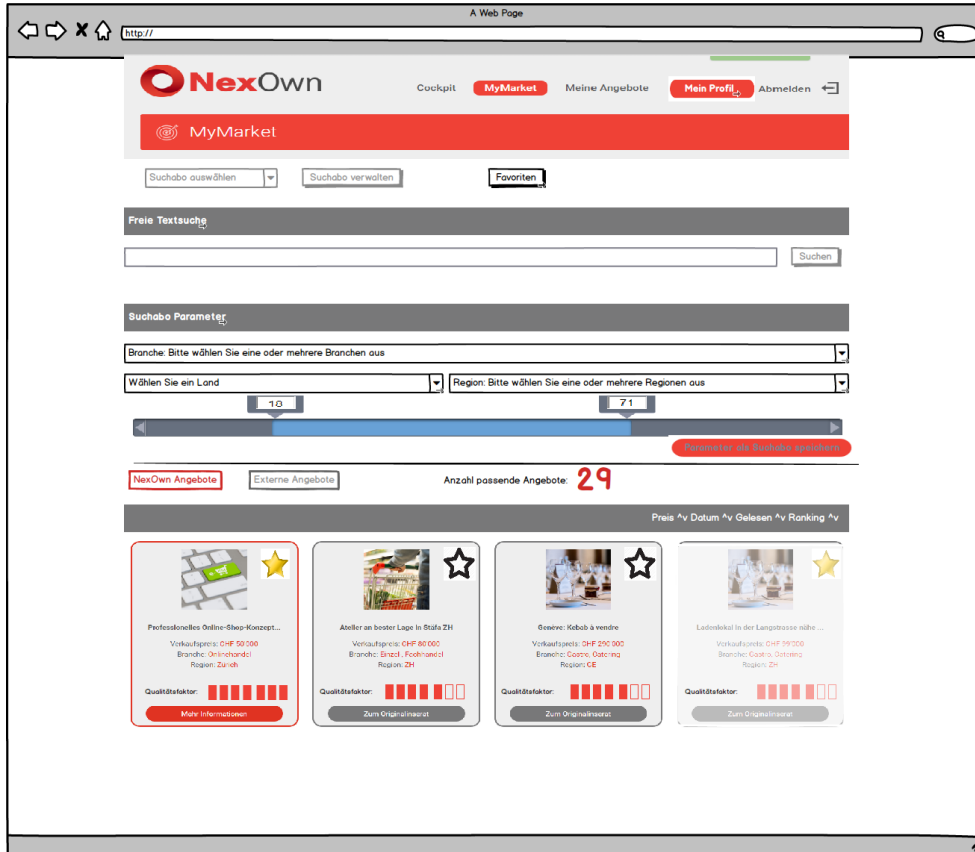

Abbildung 6: MyMarket Updated

5.5.4 RATING DISPLAYING

For internal and external offers we want to change how we display the rating. Now we don't display the labels anymore and put all 7 fields together.

So if an offer fulfils all criteria, it will display 7 red filled squares.

If an offer only fulfils 5 criteria points, we display 5 red filled and 2 white squares.

Abbildung 7: New Rating Display

ERNI

5.5.5 DISPLAY OFFER

Favourite Star:

Internal and external can now be saved as favorites by clicking on the star icon. This will then change from a white star to a filled yellow star. This offer will then be visible on the favorites page.

Published Date:

For internal offers: The date when we first publish the offer by filling in the public detail page.

For external offers: The date when we send the notification.

Rating:

For internal offers: Due that fact that the admin can set areas in the regions (like in the external offers), we also offer rating points in the internal offers.

Displaying:

Additionally to the “New” icon we would offer a second visibility. All offers that have been clicked once will be lighten/transparent.

The display order will be :

1. Internal Offer:
 - 1.1 Newest and unread first
 - 1.2 all unread sorted by newest first
 - 1.3 all read (lighten/transparent) sorted by newest first
2. External Offers:
 - 2.1 Newest and unread first
 - 2.2 all unread sorted by newest first
 - 2.3 all read (lighten/transparent) sorted by newest first

Abbildung 8: Displaying internal & external offers

ERNI

5.5.6 ORDERING OFFER VIEW:

The buyer has the possibility to change the order of the view by the following criteria.

As soon as he changes the order in the offer view, we don't prioritize the internal offers. Then the order will be sorted without differing between internal and external.

-Price: Ascending and Descending without making a difference between internal and external

-Date: Ascending and Descending

-Already read: First unread or first already read

-Ranking: Ascending and Descending

Aktuelle Angebote für Sie:	Preis ^v Datum ^v Gelesen ^v Ranking ^v
----------------------------	---

Abbildung 9: Ordering View Features

5.5.7 INTERN OFFER DETAIL PAGE

The buyer has now an additional view, where he sees more information.

This information is also visible if he doesn't have an NDA approved yet, so it's not necessary to have an approved NDA to see this page.

This page displays all public offer details:

-<public offer title>,-<public offer pic>,-<public offer description text>,-<public offer price>,-<public offer branche>,-<public offer region>

Favourite Star:

The buyer can add this item to the favourite page or request more information.

More Information Button

The more information button will activate the actual process with the management summary and adds the company to the observer list and fails if the buyer has not an approved NDA.

(Same functionality like the more information in Version 2.1)

Back Button

The back button is leading back to the place where the offer was clicked (MyMarket or Favourite Page)

URL:

For marketing purposes, we would like to have an url to a specific detail page, where we can use the link. (User has still to login and then get forwarded to the detail page)

(example: we post on facebook: "Best onlineshop of the world for sale click here" and then user should be linked to the mymarket login and after login to the detail page)

Abbildung 10: Intern Offer Detail Page

5.5.8 FREE TEXT SEARCH:

The free text search field allows the buyer to enter free text.

This free text has an auto-complete function which gives suggestions.

Functionality:

- The text proposals are titles or words found in the <intern public offer title> or <intern public offer description> or <extern offer title>
- After pressing Enter the search starts
- Search respects all filters if set (region, branche, price)
- the MyMarket page shows only offers that contain the search text and match the filters.
- Results are still ordered by first internal then external and newest first

Button:

For DAU's we also offer the Search Button. For those who don't understand that they could press enter.

Abbildung 11: Free Text Function

5.5.9 BRANCHE SELECTOR

The content of the selector should not pop over, it should extend the page. (typical javascript effect)

The branch selector has the same behaviour as now and has the same functionality as now:

- User can select up to 5 industry sectors
- User receives a pop-up if he selects more, and the selected value is unchecked again

New functionality:

- All selected values are listed in the head of the dropdown box
- Selecting a branche displays immediately the results and updates the counter
- The industry sectors are displayed in the dropdown box in 3 columns in the desktop version

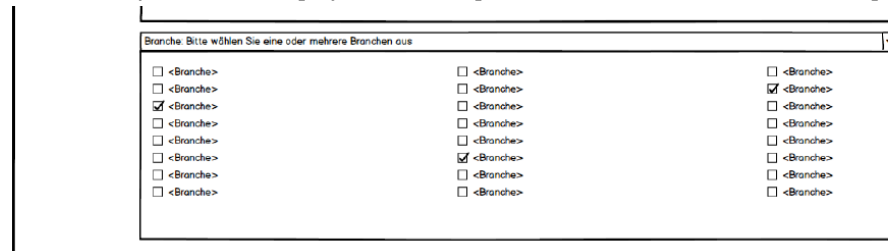

Abbildung 12: Branche DropDown Selector

5.5.10 COUNTRY SELECTOR

The content of selector should not pop over, it should extend the page. (typical javascript effect)

Like in 2.1 we still offer the user the possibility to select multiple countries. Also he still has an overall selection of max. 10 regions.

Switzerland is selected by default and all Swiss regions are loaded in the region selector.

Changing the country will update the region selector with the specific region. (like in 2.1)

Following Country can be chosen:

- Schweiz
- Deutschland
- Österreich

Abbildung 13: Country Selector

5.5.11 REGION SELECTOR

The content of the selector should not pop over, it should extend the page. (typical javascript effect)

Same behavior as in the industry selector.

- User can select up to 10 regions
- User receives a pop-up if he selects more, and the selected value is unchecked again

New functionality:

- All selected values are listed in the head of the dropdown box
- Selecting a region displays immediately the results and update the counter
- The regions are displayed in the dropdown box in 3 columns in the desktop version

Abbildung 14: Country Specific Region Selector

ERNI

5.5.12 PRICE “FROM”-“TO” SLIDER

The price should now be selectable in a slider with 2 pointers. One represents the “from” and the other the “to”. The Price range is still from “0 CHF” to “>10'000'000 CHF”. The slider should jump over the same defined values like in 2.1. Other values are not allowed. Also the slider should show on which position he’s actually pointing. Max value cannot be lower than min value and 0-0 is also not allowed.

Abbildung 15: Price Slider

5.5.13 LEGENDS, COUNTER AND SAVING

- This section explains with a legend, which offers are internal or external.
- A counter which reacts to every change that the user makes in the filter criteria, shows the total amount of internal and external offers.
- A button is for saving a searchabo.

Abbildung 16: Legend, Counter and SaveButton Panel

5.5.14 SAVE SEARCHABO

The buyer has the possibility to save his configuration (only Premium Account). For that he has 2 possibilities:

Saving a new Searchabo:

- If there are no searchabo selected and the user presses “Parameter als Suchabo speichern”
- The save popup window appears and asks for entering a searchabo name
- User can save or cancel the process
- Searchabo is created with the default values. (see 5.6)

Updating a Searchabo:

- Abo is selected in the searchabo dropdown
- User clicks on “Parameter als Suchabo speichern” button
- Popup window appears with the searchabo name
- User has the possibility to give a new name (creates a new searchabo)
 - default values are taken
- User keeps the name → searchabo is updated and saved.
- all configured values for the searchabo are kept

5.5.15 FREE ACCOUNT: SECRETLY SAVE SEARCHABO

Due that the free member cannot save the searchabo we would like to save the last search of the user as “secret” searchabo, that is not visible for the free user but helps for the statistics for the admin.

So the statistics has a new type of searchabo and the admin can still see what the people are looking for, but the free member sees nothing of all that. For that we always save the last 50 searches of the buyer.

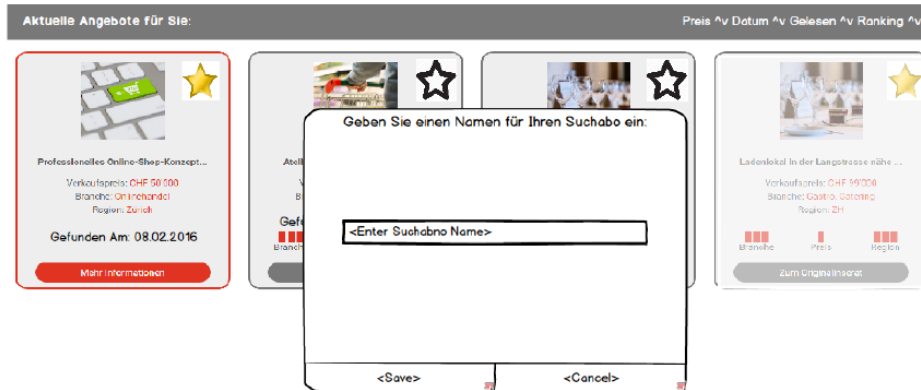

Abbildung 17: Save/Update Suchabo

5.6 SEARCHABO OVERVIEW

This page gives the user the possibility to see which searchabos he has. Also he can change some settings for each searchaboo:

Column 1:

- Searchaboname: User can directly change the name of the searchabo in this text field
- Branchen: Lists all selected industry sectors coma separated.
- Regionen: List all selected Regions coma separated.
- Price: Displaytext: "von <selectedFromPrice> bis <selectedToPrice>"

Column 2:

- Email Notification: User can choose if he wants to receive an email notification.
 - If notification is set to yes, then the radio buttons are enabled:
- Notification interval: User can choose if he wants go get notified:
 - Daily
 - Once per Week (always on Monday)
 - Once per Month (always first Day of Month)
- Arrow to Offers:
 - Loads the MyMarket Page with the searchabo dropdown selected with the specific searchabo.
 - All parameters are set like in the searchabo
 - The offers are filtered due the searchabo criterias
- New Offer since last visit:**
 - Displays the amount of new offers since the last visit.

-Delete Button:

The Delete Button offers the possibility to delete the searchabo. (see 5.6.1)

The Default values when saving a new searchabo are:

- Email notification is set to "ON"
- Notification interval is set to "daily"

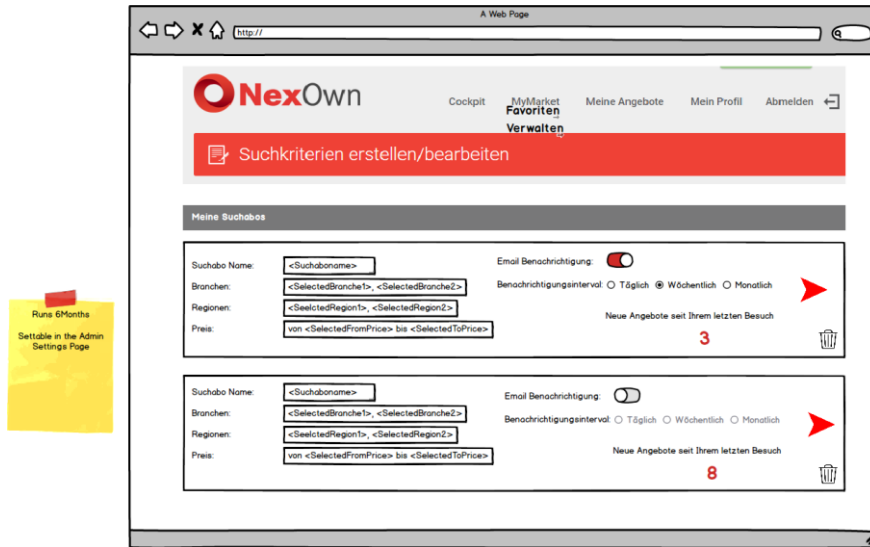

Abbildung 18: Searchabo Overview Page

5.6.1 NEW OFFERS SINCE LAST VISIT

This number shows the user the amount of new offers since his last visit to this searchabo. The idea is, that when landing on his searchabo overview page, he directly sees which searchabo has how many new offers.

Neue Angebote seit Ihrem letzten Besuch

3

Abbildung 19: New Offers since last visit

5.6.2 DELETE SEARSHABO

By clicking on the trash icon, the buyer has the possibility to remove a specific searchabo. A popup Window will then appear and ask if he really wants to delete the searchabo. If the user clicks on yes → searchabo will be deleted and removed from the list. Also all notification for this specific searchabo will be then removed. If he clicks on cancel, the buyers returns back to the searchabo list.

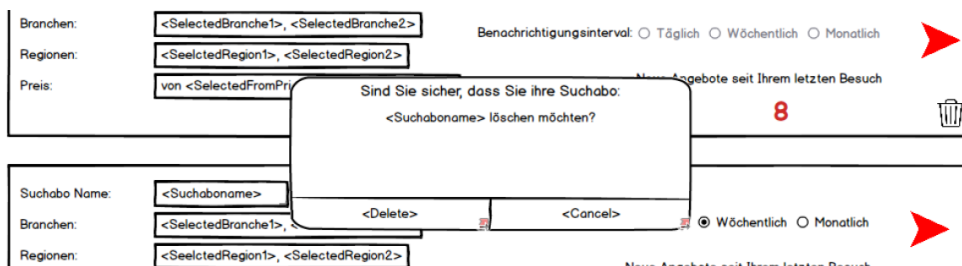

Abbildung 20: Delete Searchabo PopUp-Window

ERNI

5.7 OFFER FAVOURITES

All added favourites will be displayed on this page.

The buyer can access this page via the button on the MyMarket overview.

The offers will be order by:

- First Internal Offers and then external offers
- Ordered by Newest First.

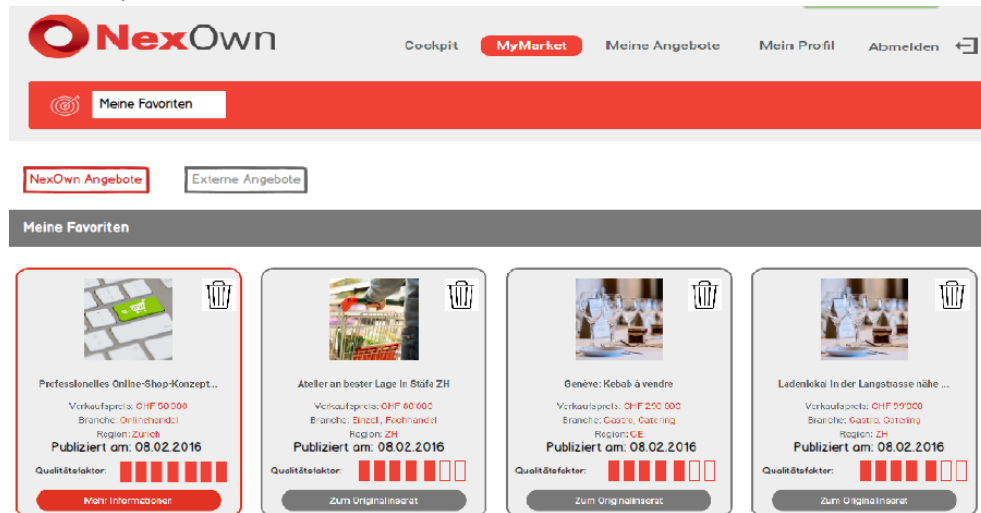

Abbildung 21: MyMarket Favourites Page

5.7.1 DELETE FAVOURITES

By clicking on the trash icon, the buyer has the possibility to remove a specific offer.

A popup Window will then appear and ask if he really wants to delete the offer.

If the user clicks on yes → offer will be deleted and removed from the list.

If he clicks on cancel, the buyer returns to the favorite list.

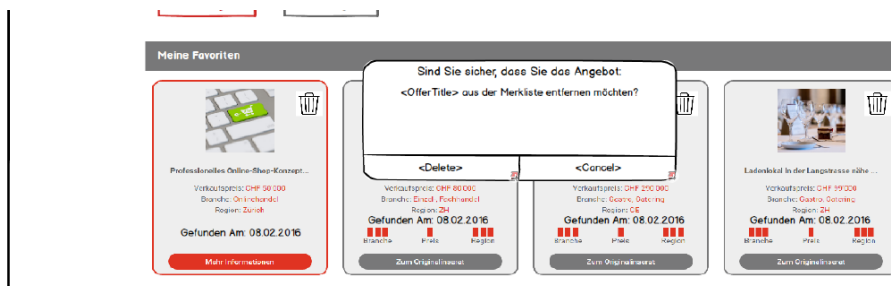

Abbildung 22: Delete Offer from Favourites

5.8 E-MAIL NOTIFICATION

5.8.1 E-MAIL NOTIFICATION FOR NEW EXTERNAL OFFERS

The same like now. No changes needed.

5.8.2 E-MAIL NOTIFICATION FOR NEW INTERNAL OFFERS

This email should also have the same structure as the external offers and should be sent when saving the public offer detail. But it also includes the public offer description.

For that please see the mail template under the attached documents (1.2)

5.8.3 E-MAIL NOTIFICATION FOR UPDATING SEARCHABO LIFETIME

After <X> months (time is set by administrator in the settings), the user receives an e-mail notification, which allows him to extend the searchabo.

The E-Mail comes <X> days before (time is set by administrator) the searchabo expires.

By clicking on the link, the user lands (after successfully logged in) on the searchabo page and a message appears that his searchabo has been successfully extended.

If the user doesn't extend his searchabo he receives a second mail for extending and a remark that the searchabo will be deleted if not extended.

Suchabo Name: <Suchaboname>

Branchen: <SelectedBranches>, <SelectedBranch2>

Regionen: <SelectedRegion>, <SelectedRegion2>

Preis: von <SelectedFromPrice> bis <SelectedToPrice>

Email Benachrichtigung: ☒ Ja ☐ Nein ☐ Täglich ☐ Wöchentlich ☐ Monatlich

Vielen Dank!

Ihr Suchabo wurde erfolgreich reaktiviert!

Sie werden seit Ihrem letzten Besuch

Abbildung 23: Searchabo successfully extended message

5.8.4 DISABLE SEARCHABO IF NOT EXTENDED

If the user doesn't extend the searchabo during the X days the searchabo will be then disabled.

Following template displays the content of the email subject and body.

NexOwn Suchabo <searchbo_name> läuft ab

Siehr geehrter Herr <surname> <lastname>

Ihr Suchabo <searchbo_name> läuft in 10 Tagen ab.
Falls Sie diesen Suchabo weiterhin möchten klicken Sie auf folgenden Link um das Suchabo zu verlängern:
<link_to_renew_searchbo>

Oder gehen Sie auf NexOwn MyMarket auf der Merkliste Seite und erneuern Sie den dort.

Freundliche Grüsse

Bewerten Sie Ihre Firma selbständig mit unserer **NexOwn Bewertungs-App**:

Abbildung 24: E-Mail Template to extend Searchabo

5.9 UPDATE MY PROFILE PAGE

This page also show now the account type next to the salutation of the user. Also he can directly click on the account type to upgrade or change his account type.

This link will redirect him to the account overview page.

The screenshot shows a web browser window with the address bar displaying 'NexOwn MyCompany'. The page title is 'Profil/Lebenslauf bearbeiten'. The form is titled 'Profil' and 'Benutzerangaben'. It contains the following fields and elements:

- Anrede:** A dropdown menu showing 'Herr'.
- Account:** A text box containing 'FREE' and a blue link 'GET PREMIUM'.
- Benutzername:** A text box containing 'ake'.
- Vorname:** A text box containing 'Selim'.
- E-Mail Adresse:** A text box containing 'selim.akyol@er-management.com'.
- Nachname:** A text box containing 'Akyol'.
- Aktuelles Passwort:** A text box.
- Neues Passwort:** A text box.
- Neues Passwort bestätigen:** A text box.
- Telefon:** A text box containing '1234'.
- Strasse:** A text box.
- PLZ:** A text box.
- Ort:** A text box.

A yellow notification box with a red border and a red 'X' icon in the top right corner contains the text: 'NO Email Notification Question with yes/no'. At the bottom of the form are two red buttons: 'Speichern' (with a save icon) and 'Account Löschen' (with a trash icon).

Abbildung 25: Mein Profil Page updated

6. ADMIN REQUIREMENTS

6.1 THE ADMIN CAN CHANGE ACCOUNT TYPE

The admin can change the account type of each buyer. He can choose if he wants to put this account for 3,6,12 Months as premium for free.

6.2 PUBLIC OFFER DETAILS

The public offer details page has now some new fields, due to the new internal detail page.

6.2.1 COMPANY DESCRIPTION TEXT

The company description text should allow to make simple html tags for formatting the text. (Bold, Italic, font-size, font-color).

The text area should be big enough, so that the admin can add context of half a page size (A4).

6.2.2 PUBLIC BRANCHE SELECTOR

The selector takes by default the industry sector that the seller has chosen and puts in the data of the company.

For marketing reasons, the admin should be able to change this industry sector. The buyer will always only see the value selected in the public branche selector.

6.2.3 PUBLIC REGION SELECTOR

The public region selector takes by default the region that the seller has chosen.

For marketing reasons, the admin can select areas to increase the reachability of buyers.

Bordering Regions:

-If an offer is in the adjacent region where the buyer is looking for, then the offer will be displayed, but with a ranking of 2. (please see in the referred docs 1.2)

Areas:

-Also we want to offer areas (that includes more than 1 region). This is 1:1 the same mapping that we took for different external platform like "firmenhandelsplatz.ch" (please see in the referred docs 1.2)

The screenshot shows the 'NexOwn ADMIN' interface. The top navigation bar includes links: Home, Meine Unternehmen, Mein Profil, Abmelden, Home, Mandate, Käufer, Contact Person, Einstellungen, Abmelden. Below this is a red 'Company Cockpit' header. The main content area is titled 'Public Offer Details'. It contains a form with the following fields:

- Image:** A small image placeholder with a 'Datei auswählen' button and 'Keine ausgewählt' text.
- Title:** A text input field containing 'Stark wachsende Elektroinstallationsfirma mit Überdurchschnittl'.
- Price:** A text input field containing '3500000'.
- Company Description:** A large text area with a placeholder '<pre>Company Description</pre>'.
- Branche:** A dropdown menu with '<Select Branche>'.
- Region:** A dropdown menu with '<Select Region>'.

There are two yellow notes overlaid on the form:

- Note1:** User can select "Grossregion" Which will change Rating and Mapping
- Note2:** Per Default Branche and Region are selected from the company detail

Abbildung 26: Intern Public Offer Details

ERNI

6.2.4 SEARCHABO SETTINGS

In the admin settings page the admin can set the different time intervals:

Searchabo Default Life time:

- The amount of days of a lifetime of a searchabo. (default 3 Months)
- The amount of days when the FIRST email searchabo extension is sent (20 days)
- The amount of days when the SECOND email searchabo extension is sent (50 days)
- The default notification radio button value (daily)
- The default of searchabo notification (active)

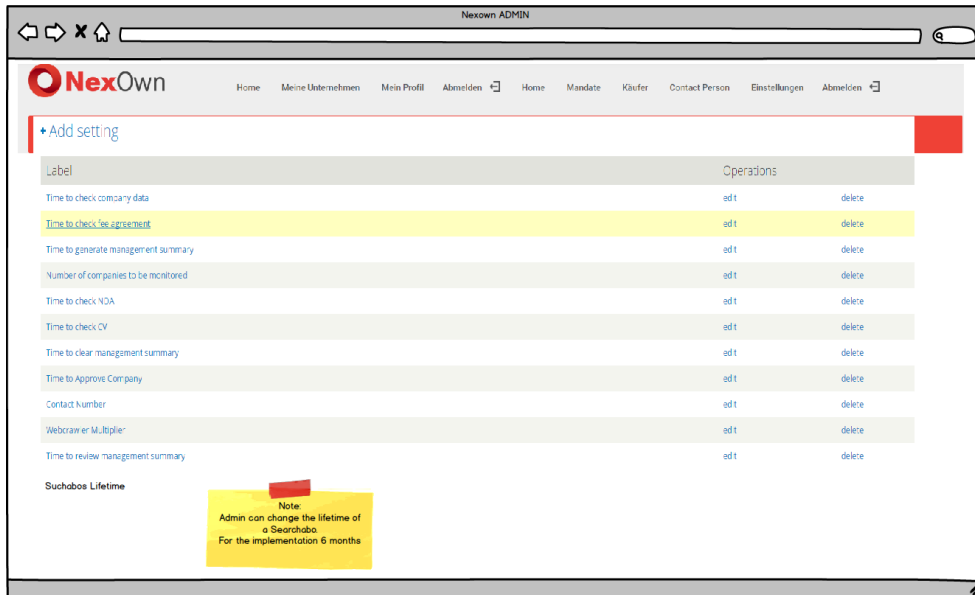

Abbildung 27: Admin Settings Page

ERNI

7. UPGRADING DATA

A very important step is, that all registered user from 2.2 should then keep their searchabo when upgrading to 2.3.

This means, every buyer will have after the upgrading already 1 searchabo.

The default parameter will then be:

- The selected regions that the buyer already have.
- The selected branche that the buyer already have.
- The selected price range that the buyer have.
- The E-Mail Notification that he has settled.
- The notification interval will be set to daily.

1. 1 YEAR FREE PREMIUM FOR ALL EXISTINGS ACCOUNTS

Also we want to offer all already existing accounts a 1 year premium account for free.

8. USE CASES

8.1 UC BUYER1: VIEW INTERNAL OFFER

ID:	UC B1
Title:	View Internal Offer
Description:	User clicks on the mymarket page on an internal offers because his interested in this offer.
Primary Actor:	-Buyer (Who wants to receive more information about this offer)
Preconditions:	-Buyer has successfully logged in -Buyer has set some search details in the MyMarket Page -Buyer sees an internal offer that interests him
